More than half of the children under age 1 (55.1%) in out-of-home care had parental alcohol or drug abuse as a circumstance reported at removal. The percentage for children age 1 and older (34.0%) was closer to the overall national average (38.0%).

*Note: Estimates based on **all children in out of home care at some point** during Fiscal Year;*

**Due to missing data for children without parental alcohol or drug risk factors, percentages were estimated using total number of entries for IA, IN, KS, and NC*
